

Date: \_\_\_\_\_

Insured Name: \_\_\_\_\_

Dwelling Location: \_\_\_\_\_

Length of time at this location: \_\_\_\_\_

Does your basement have an accessible backwater valve?  Yes  No

If yes, select the type of valve:

- New style backwater valve with flapper that protects the basement plumbing and catch basin (protects the entire system)
- Older system backup valve that protects only the catch basin (float style valve)

Does your dwelling have a sump pit?  Yes  No

Does your dwelling have a sump pump?  Yes  No

If yes, select the type of pump:  Submersible  Above grade

Age of sump pump: \_\_\_\_\_

Is your dwelling equipped with a water leak detection system?  Yes  No

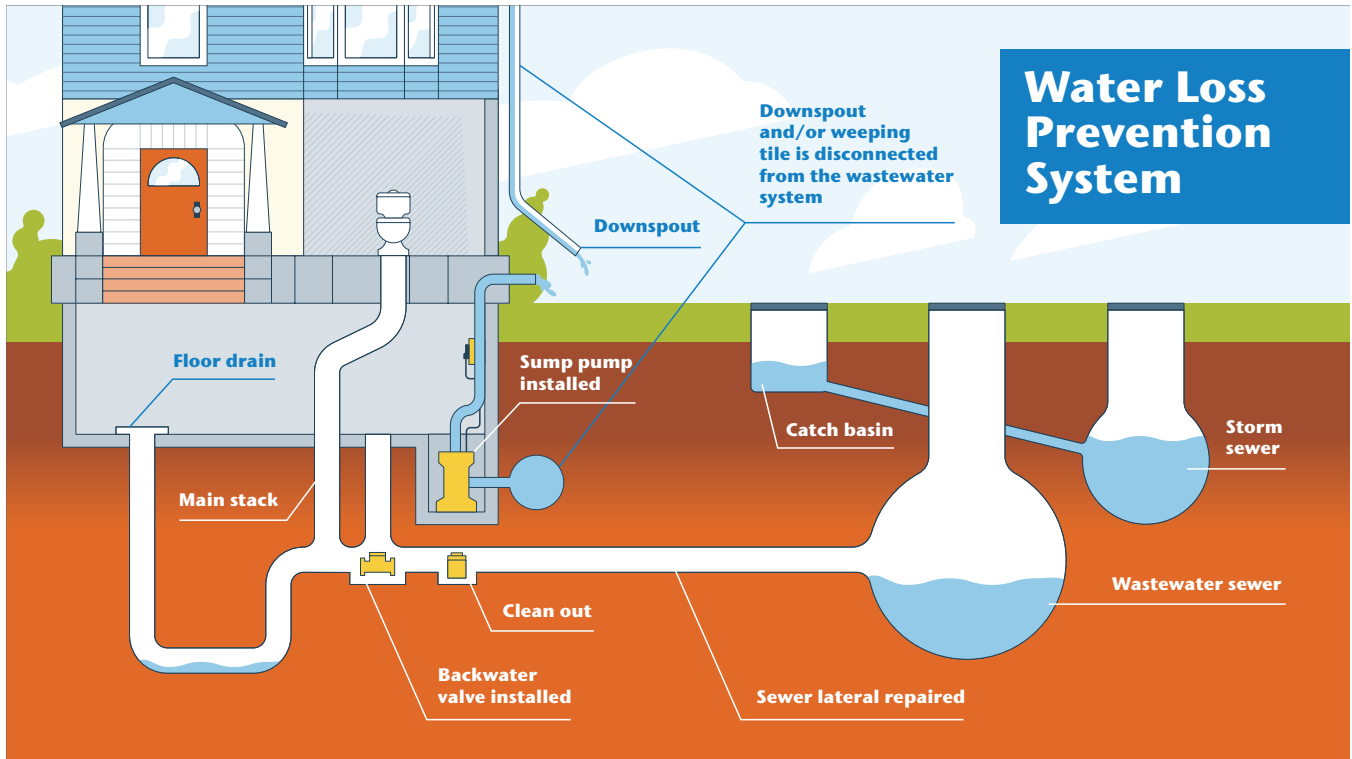

If yes, select the type of pump:  Automatic  Manual  Monitored

Have you had a water loss prevention consultation with a plumber?  Yes  No

**FOR RENEWALS OR MID-TERM CHANGES ONLY**

If the dwelling has sustained flooding/water/sewer damage, please provide: the date of loss, cause of loss, amount of damage, and date when repairs completed:

What preventative measures have been put in place as part of these repairs?

This is one example of a water loss prevention system; variances will occur depending on municipal regulations, septic systems and rural set-ups.
